## *About*

Having worked in quite a few industries I have learned to recognize the important balance in hard work and empathy. I pride myself on my ability to be open-minded and understanding while winning the hearts of my peers through a positive work-ethic and a sense of teamwork. Whether grounding a signal flow for a live band's upcoming performance or working with a client to build a portfolio site, it is incredibly important to me to promote a healthy, inviting, and comfortable environment to complete the best work possible. I feel that time and effort are required to make the best product but should not undermine efficiency. With that being said, I have spent a lot of time training and teaching others and firmly believe that anyone is capable of anything they set their minds to.
